## Analysis Certificate

### Animal data

Name: NOIR  
Date of birth: . .  
Sexe: Female  
Unknown: NOIR  
Breed: Unknown

### Sample data

VHL\_ID: H437363  
Test ID-nr: 478430 1  
Material: Swab

### H873 - Ichthyosis 2 - GR - Date of test: 22.03.2021

Testresult: NORMAL

D. Mioch, MSc Veterinary Medicine  
CEO

### H873 - Ichthyosis 2 - GR

Explanation about the result:

**NORMAL:** The animal is free and has two healthy alleles. When used in breeding, this animal will not become ill due to the disease. It cannot spread the disease in the population.

**CARRIER:** The animal is carrier and has one healthy and one mutant (disease) allele. When used in breeding, 50 percent of the offspring will receive the disease allele. Carriers will not become ill.

**AFFECTED:** The animal is affected and has two mutant (disease) alleles. When used in breeding, all offspring will receive the mutant allele from this animal. Affected animals will become ill.

VHL exercises the utmost care in performing each of its engagements. No party other than the principal may derive any rights from the results of these engagements, and the principal expressly indemnifies VHL in respect of any third-party claims. VHL policy provides that any complaints must be received within eight days of the completion of an engagement and imposes restrictions on liability. In that respect, VHL refers to its General Conditions, which are applicable to all engagements VHL performs and which were enclosed with the submission form. These General Conditions can also be reviewed at [www.vhlgenetics.com](http://www.vhlgenetics.com). The work VHL performs is based on the material and/or data it receives from its principal. This report may only be copied in its entirety. The organization is ISO:9001 certified for all her work. This test is based on PCR technology.
